Detailed Class Specifications

Class: Member

```
class Member {  
    // Properties  
    - member_id: string          // Primary key (UUID)  
    - name: string                // Member's full name  
    - email: string               // Unique email address  
    - password: string            // Hashed password  
    - age: number                 // Member's age  
    - gender: string              // Gender  
    - phone: string               // Contact number  
    - join_date: Date             // Registration date  
    - status: string               // Active/Inactive status  
  
    // Methods  
    + register(data: MemberDTO): Promise<Member>  
    + login(email: string, password: string): Promise<AuthTokens>  
    + getProfile(): Promise<MemberProfile>  
    + getWorkoutPlans(): Promise<WorkoutPlan[]>  
    + getDietPlans(): Promise<DietPlan[]>  
    + getAttendance(): Promise<Attendance[]>  
    + getProgress(): Promise<Progress[]>  
}
```

Class: Trainer

```
class Trainer {  
    // Properties  
    - trainer_id: string          // Primary key (UUID)  
    - name: string                // Trainer's full name  
    - email: string               // Unique email address  
    - password: string            // Hashed password  
    - specialization: string       // Area of expertise  
  
    // Methods  
    + login(email: string, password: string): Promise<AuthTokens>  
    + getAllMembers(): Promise<Member[]>  
    + assignWorkoutPlan(memberId: string, details: string): Promise<WorkoutPlan>  
    + assignDietPlan(memberId: string, details: string): Promise<DietPlan>  
    + recordAttendance(memberId: string, status: string): Promise<Attendance>
```

```
+ updateProgress(memberId: string, data: ProgressDTO): Promise<Progress>
}
```

Class: WorkoutPlan

```
class WorkoutPlan {
    // Properties
    - plan_id: string           // Primary key (UUID)
    - member_id: string          // Foreign key to Member
    - trainer_id: string         // Foreign key to Trainer
    - plan_details: string       // Workout plan description
    - created_at: Date           // Creation timestamp

    // Methods
    + create(data: WorkoutPlanDTO): Promise<WorkoutPlan>
    + getByMemberId(memberId: string): Promise<WorkoutPlan[]>
    + update(planId: string, details: string): Promise<WorkoutPlan>
}
```

Class: DietPlan

```
class DietPlan {
    // Properties
    - diet_id: string           // Primary key (UUID)
    - member_id: string          // Foreign key to Member
    - trainer_id: string         // Foreign key to Trainer
    - diet_details: string       // Diet plan description
    - created_at: Date           // Creation timestamp

    // Methods
    + create(data: DietPlanDTO): Promise<DietPlan>
    + getByMemberId(memberId: string): Promise<DietPlan[]>
    + update(dietId: string, details: string): Promise<DietPlan>
}
```

Class: Attendance

```
class Attendance {
    // Properties
    - attendance_id: string      // Primary key (UUID)
    - member_id: string           // Foreign key to Member
    - date: Date                  // Attendance date
    - status: string               // Present/Absent

    // Methods
    + record(data: AttendanceDTO): Promise<Attendance>
```

```
+ getByMemberId(memberId: string): Promise<Attendance[]>
}
```

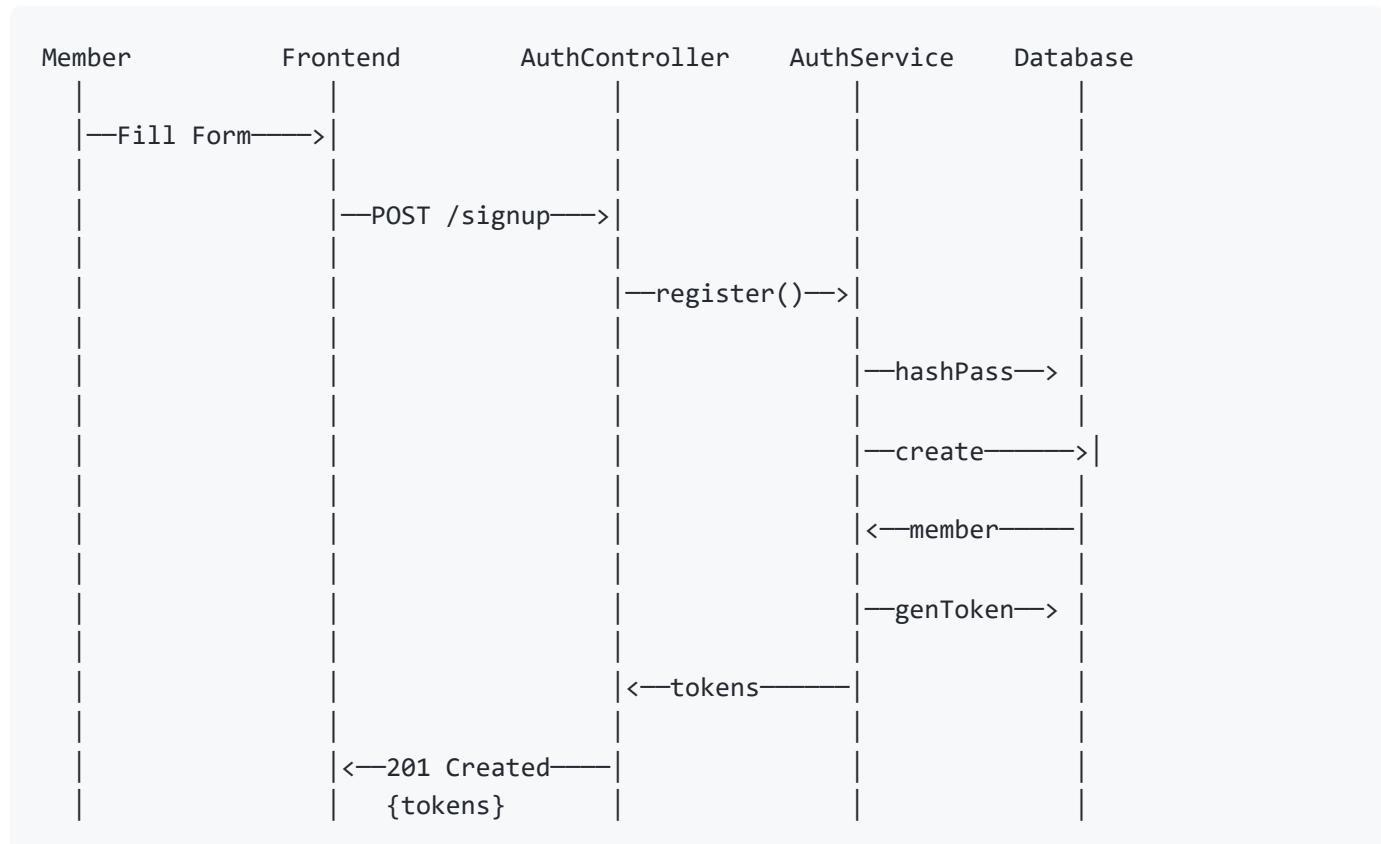

Class: Progress

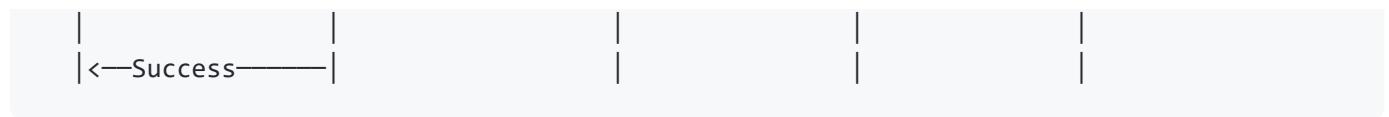

```
class Progress {
    // Properties
    - progress_id: string          // Primary key (UUID)
    - member_id: string            // Foreign key to Member
    - trainer_id: string           // Foreign key to Trainer
    - weight: number               // Weight in kg
    - body_fat: number             // Body fat percentage
    - muscle_mass: number          // Muscle mass in kg
    - notes: string                // Optional notes
    - updated_at: Date             // Update timestamp

    // Methods
    + create(data: ProgressDTO): Promise<Progress>
    + getByMemberId(memberId: string): Promise<Progress[]>
    + update(progressId: string, data: ProgressDTO): Promise<Progress>
}
```
